

Drive-through scale foldable

2825

- ▶ Approvable class III
- ▶ Foldable, for special hygienic requirements
- ▶ To drive on or over
- ▶ Scale can be positioned directly on the wall
- ▶ Stainless steel platform, 1.4301

Features

The drive-through scale is ideally suited for daily use in incoming goods, outgoing goods or in production. It can be used in a wide variety of industries such as transport & logistics, food processing companies and manufacturing companies. The scale has a particularly flat design and can be easily and conveniently driven on or through with the optional ramps. Due to the special pivot point construction, the scale can be positioned directly on a wall with the rear side facing. In addition, the scale is very easy to clean, as it can be opened very wide.

- ▶ Approvable class III
- ▶ Weighing platform made of stainless steel, 1.4301, foldable
- ▶ Low drive-on height (40 mm)
- ▶ Stainless steel load cells
- ▶ Stainless steel plenum box
- ▶ Plenum box protection class IP 65 (**increase of protection class with IP 68 possible with encapsulated plenum box, see accessories)
